

KSM Ribbon Microphones

with Roswellite™ Ribbon Technology

For professional audio connoisseurs, Shure KSM ribbon microphones offer the finest passive, dynamic audio quality with the confidence of superior construction.

The risks of traditional, delicate ribbon microphone ownership no longer apply, as both KSM ribbon models feature proprietary Roswellite™ ribbon technology for revolutionary ribbon resilience and durability.

Hand assembled in the USA from state-of-the-art transducers, transformers and metals, the **KSM353** and **KSM313** ribbon microphones exemplify Shure quality for prestigious vocal and acoustic performances, even under extreme SPL conditions.

KSM353

Premier Bi-directional
Ribbon Microphone

KSM313

Dual-Voice
Ribbon Microphone

KSM353

Premier Bi-directional Ribbon Microphone

Crafted with matched polar pattern symmetry for pristine audio in studio and concert hall applications.

- ❖ **Bi-directional polar pattern** delivers premier, completely symmetrical audio with superior off-axis rejection
- ❖ **Revolutionary Roswellite™** proprietary ribbon material replaces traditional foil ribbons with high tensile strength, toughness and shape memory that provides superior resilience at extreme SPLs
- ❖ **Custom ribbon motor assembly** tailors bass response without attenuating the overall output for full low and mid ranges, and superior upper range presence from a rising frequency response
- ❖ **Double-shielded matched full-sized transformer** minimizes signal loss and maximizes output while reducing magnetic and RF interference from 90 degree placement, offset relative to the ribbon
- ❖ **146dB SPL / 30 – 15,000 Hz frequency response** ideal for capturing fast transients in vocals, acoustic instruments and concert halls
- ❖ **Legendary Shure quality and superior construction** from hand-assembly of machined steel, silver, gold and aluminum materials, and housed in a pure stainless steel casing
- ❖ **Spring-loaded suspension shock mount** for flexible, fully-isolated stand mounting
- ❖ **Upright protective wood case** included for storage when not in use

Optional Accessories and Replacement Parts:

A353SM Shock Mount

KSM313

Dual-Voice Ribbon Microphone

Features Dual-Voice design: discrete front-and-rear side sonic signatures for use with amplified instruments or for intimate vocal applications.

- ❖ **Bi-directional polar pattern** delivers premier audio with superior off-axis rejection
- ❖ **True Dual-Voicing** tuned specifically for user's for choice of response - warm and full for amplifiers, or swivel for bright and flattering vocals
- ❖ **Revolutionary Roswellite™** proprietary ribbon material replaces traditional foil ribbons with high tensile strength, toughness and shape memory that provides superior resilience at extreme SPLs
- ❖ **Custom-sourced components** for superior presence, minimized signal loss and maximized output.
- ❖ **146dB SPL / 30 – 15,000 Hz frequency response** ideal for capturing fast transients in vocals, acoustic instruments and concert halls
- ❖ **Legendary Shure quality and superior construction** from hand-assembly of machined steel, silver, gold and aluminum materials
- ❖ **Monocle stand mount** custom swivel mount for fully versatile placement and orientation
- ❖ **Protective wood case** included for storage when not in use
