THE RECORDING ACADEMY®

October 27, 2008

The Honorable Kevin Martin  
Chairman  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20544

CC: Commissioners Jonathan Adelstein, Michael Copps, Robert McDowell, Deborah Tate

Re: ET Docket No. 04-186

Dear Chairman Martin:

On behalf of The Recording Academy, an organization representing nearly 20,000 music professionals, we have followed and submitted comments on the White Spaces issue and its effect on our members' ability to provide the high quality concert experiences demanded by the American public. Representing leading sound producers and engineers, we wish to express serious concern with the status of the White Spaces proceeding. We believe both the accelerated timing of the vote without an adequate public comment period, as well as the order itself, puts the incumbent wireless microphone industry at great risk.

At a minimum, the Commission should open a formal comment period on the report entitled *Evaluation of the Performance of Prototype TV-Band White Space Devices*, allowing our experts in audio technology—and other interested parties—to fully study this complex document and provide our analysis.

Further, we are troubled by the Commission's apparent willingness to allow portable White Spaces Devices (WSD) to operate using technologies that the Commission's own lab and field testing have demonstrated do not work. Any reliance on "sensing" technologies should be abandoned, as the OET's own tests showed significant failures of this methodology.

We propose, as an alternative, the Commission set aside at least eight (8) channels for dedicated wireless microphone usage, and adopt a geolocation and database process to allow for larger operations, including concerts at stadiums, arenas, amphitheatres, and similarly sized venues. This combination will afford the incumbent users some protection, while still allowing portable WSD to operate without the need for a theoretical sensing ability.

Live music production is an essential American endeavor that relies heavily on the white spaces of the spectrum to operate. We therefore rely on you and your fellow Commissioners to protect this part of the spectrum, and thus allow the music to play on for our citizens.

Sincerely,

Neil Portnow  
President/CEO  
The Recording Academy
